

Position Available: Research & Development Manager

Agri-Starts, Inc., a leader in the plant tissue culture industry and new plant introduction. Has an opening for a Research & Development Manager. We are expanding into food crops, and biofuels.

Responsibilities include but are not limited to explanting, media trials, production improvement and follow through in the greenhouse. Qualifications for this position include B.S. degree minimum, prefer a M.S. or PhD degree and a background in tissue culture, preferably some organic chemistry and some production exposure. The applicant should have good organizational skills, attention to detail and the ability to work alone. Innovative talent, a practical mind and good record keeping are all desirable qualifications. Salary will be commensurate with experience.
